House of Industry Minute Books and Case Recommendations

Covering the period 1855 through 1882, the Minute Books and Case Recommendations of the House of Industry in Toronto record the details of families and individuals made vulnerable due to illness or injury; to age and ability; to an absent parent or spouse; to challenges finding employment; and sometimes due simply to temporary bad luck. The books contain over 20,000 entries originally captured in six large ledgers of minutes and preserved at the City of Toronto Archives: Fonds 1035, Series 802.

This transcription was assembled Sep 2020 by the Toronto Branch of the Ontario Genealogical Society from manuscripts at the City of Toronto Archives: Fonds 1035, Series 802 as indicated below, with links as indicated to digitized manuscripts at the Internet Archive:

Minutes and case recommendations from the missing years 1875 to 1878 in all likelihood were also captured in a single large minute ledger, which is not present in the collection — although references are made in later years to case entries from those years.

Digitization and Transcription of House of Industry Records

To celebrate the 50th Anniversary of the Toronto Branch of the Ontario Genealogical Society in 2017, the Toronto Branch joined with two partners to digitize records from the House of Industry. With the support of the City of Toronto Archives, the Branch funded digitization of Series 802 and Series 804 from

Fonds 1035 — a major portion of the House of Industry collection — and digitization was completed by the Internet Archive (archive.org) who also host the digitized and transcribed records.

Series 802, the records of aid applications and recipients, are all handwritten manuscript documents and registers that were digitized as images, but could not be digitized to text by automated means.

Volunteers organized by the Toronto Branch transcribed these records beginning in 2018. The Minute Books and Case Recommendations are the first records from the collection to be fully transcribed into searchable records.

Series 804, the trustee and annual reports, are all published, typeset documents that were digitized as images, and converted to searchable text by OCT.

Notes on the transcription:

In the transcription, each page of the manuscript begins with a page header including a hyperlink to the digitized manuscript. Spacing has been added to improve readability. Transcription is faithful to the original manuscript preserving spelling and punctuation.

Symbols used:

- {...} = a best guess caused by uncertainty in the transcribed word; or missing information indicated by space left blank by the author where text was intended
- [...] = an alternate spelling suggested by another source; or translation of a manuscript symbol; or a notation to record a manuscript error (for example, where case numbers are skipped or re-used)
- ^...^ = text inserted by an author of the manuscript in the margin or above a line
- ~~text~~ text struck out by an author of the manuscript
- text text underlined by an author of the manuscript

5. I have examined Eliza Ward this day, & am of opinion that while her residence in the House of Industry is indispensable for a time, merely as a place of refuge. She being more imbecilic than affected with any more {decided} form of insanity, nonetheless, it would be advisable that she should be sent back to her friends in Dublin, as soon as the navigation would permit. It is clearly one of those cases in which certain members of a family or parish authorities at home send out incapables to Canada or the United States with a view to economy and the saving of trouble.

232. I have this day visited the out shed. we were obliged some time ago to remove Adam Miller into it, as he passed his motions involuntarily, and was an annoyance to the other inmates of the male ward. I have ordered the Superintendent to improve his diet menus, as he is beyond the aid of medicine. the person named John Adams is a labouring under general debility. he is to be kept away from the other inmates as he has the itch. Solomon Wormsley is also an old person labouring under general debility physically as well as mentally. James Kehoe is a fit object for the institution as he is labouring under incurable disease, consumption. David Edmonds is nearly blind from an old standing disease of both Eyes. He may be relieved to some extent by careful medical treatment, but he will eventually become totally blind. William Brown with ulcerated leg, is a fitter subject for the Hospital than for the House of Industry. N. Bethune M.D.

242. The Revd. Edmund Baldwin attended in compliance with the request of the General Committee of the 20th instant, to give information respecting sending complaints, which had been made, relative to the Diet furnished to the Inmates

Mr. Baldwin was of opinion that the meals should be more varied than at present permitted.

That Meat, other than that used for Soup, should be supplied to the Inmates.

That Vegetables should be more constantly given, both in Soup, and as separate Dishes. For the space of two months the House had been without Potatoes, or any substitute.

That the fat was thick atop the surface of ^{^the^} soup placed before the Children.

That the present Cook was a person quite incompetent to fulfil the Duties this important station.

That the sick inmates whom Mr.

House of Industry Minute Book and Case Recommendations 1855-1859 Page 43

<https://archive.org/stream/houseofindustrym00hous/page/43>

Mr. Baldwin has attended in professional capacity, have frequently complained, that they could not eat the food which was set before them

The Superintendent being called upon to Explain these several Matters, he alleged;

That Potatoes were purchased in what was considered sufficient quantities, last Autumn, but that they did not hold out longer than the Month of June in this year, some having become diseased; and as in former years, the supply when Exhausted had not been renewed, so neither was it renewed in this year. In the Month of July last, by direction of the Medical Gentlemen he had procured twenty bushels; this supply also became Exhausted in August, from which period until the middle of October, the House was again without potatoes. The Superintendent in this respect acted under the directions also of the Secretary and Treasurer.

The Superintendent also states that the fat on the Soup noticed by Mr. Baldwin was an accidental occurrence. The Nurse went for the Soup for the children as usual, but as the Cook was not in the way at the moment, she took the Soup herself, and did not take the precaution of skimming it.

The Present Cook is the best of the Inmates that could be Selected for that office.

At one time, the Sick could not have their Food cooked in a suitable manner, because the stove then in use was, not calculated for the purpose. A former Stove had proper appliances; but it was removed by order of the General Committee, and another substituted which in its time has been removed, and the present stove, answers the purpose; the sick now have relishing food.

The Weekly Committee are of opinion that ^{the} entire domestic arrangements of the House, as well the practical efficiency with which they are

Carried out, should be made the subject of investigation by a special Committee, appointed by the General Committee: and they would especially recommend that the Visits of Ladies should be earnestly solicited, from Whence the most beneficial results might be expected.

Revd. Dr. Burns R. Yates & T.A. Stayner

There appears to be nothing particular to note to day, excepting that in the case of Christiana McDonald, recommended by Mrs. Grasett for admittance, the Superintendent reporting that there was no place for her, and She urging that if She could obtain a little wood, her chief want would be supplied, the Committee have given her a quarter cord, two weeks in advance of the time when She had any claim to the indulgence. She is said to be bothersome, faultfinding, & disposed to create mischief. Seems well known to the Superintendent. T.A. Stayner

The Committee are doubtful as to the propriety of giving the child to a mother so depraved in her habits, and besides they wish the Superintendent to see the Mayor G.W. But the conduct of Mary Smith, (the person named below) is altogether above the Common. Her blasphemous language, and otherwise violent behaviour; render her a very dangerous person to admit on the premises. "She says the Supt. got her put away from her place," "She also said that she had been to R_W_ [railway] Station and purchased Tickits to carry herself and child to a distant part of the Province; and the Supt. had taken them from her, and torn them up." I told Smith that he took the most active part in making this dirt, he must help to clean it. He at once flew in a rage and said that I was a tyrant, and that I must not give him any more of my blackguardism, if I did he would disclose facts and circumstances that would make me hide my face when I walked the streets of Toronto. He denied lighting his pipe in the bath room told me that I was a liar, He did not. I thought such conduct was too offensive as it was practiced before all the inmates and I called upon the Committee who considered Smith had forfeited all claims to any further benefits of the Institution; and ordered him to leave the House on Monday next. This is not the first time. See [Case] 960, ^964^ in 1854.

Hugh Derrick See [Case] 246 was before the Committee on Tuesday morning, asking admission to the House and although He was told repeatedly that there was no room in the House, and consequently could not be taken in, at least for a short time, in fact He was promised the first vacancy, the old man urged and pleaded hard to be allowed to remain, as He has no home, no friends or means, and no place to get a nights lodgings. The Superintendent told the Committee it was perhaps better to allow him to remain, and he would try and make some arrangements for him. But what is the most remarkable in this case is, before noon two young men came to the House and enquired for H.D. Said they were sons; and that their father has a comfortable home, and wanted for none of the Comforts of life, and they thought we were highly to blame for receiving into the House such persons simply because they come and wished to be taken in.

necessary from his blindness, and by reason of the mischievous conduct of Andrew Coscan in laying sticks across the paths, to trip him up. Persons visiting him, not allowed to see him. Not permitted to go to the Secretary of the St. George's Society with whom he was in correspondence to procure funds to take him back to England, where he has friends.

To these charges the Superintendent Says, that no prohibition has been laid upon the Children, to lead him about the premises; but that he objected to permit them to accompany him through the streets, and secondly that he the Superintendent had no reliable information that Bamford was really going to see the Secretary of the Society and his very frequent applications to go out lead other inmates to require similar indulgences, to the great detriment of the Institution.

Andrew Coscan declares that he never did that which has been charged against him by Bamford, and he says that if any wood was across the paths it must have accidentally fallen off the pile when taking down to be sawed. The Complaint was therefore dismissed. J. Elmsley, E. Hobson

Four of these Children are in the House of Providence and three remain with her, the eldest is dying; she is of course unable to earn a living; she tried to make a trifling by keeping a little Shop, but a far better Shop Close by took all the business of the neighbourhood, and she failed. She seems to have been well brought up. The Visitor recommends the most that the Committee will be pleased to do for them, for truly she is a most deserving object. To have 8 [pounds] of Bread, and Wood when she moves to her new quarters and brings a Note from Capt. Elmsley.

165. Pauline Mulloy, 307 Queen St. east. Husband deserted her nearly two years ago. She belongs to the Methodist Church. Has two Children, a Boy 4 years and girl 2 years. She endeavours to support herself by her Needle, but cannot make enough to pay for rent fuel and firing. She seems a respectable young Woman, and the Visitor thinks some Wood now, and again at the end of February, would be well bestowed.

166. Bridget Stinson, No. 122 Duchess Street, a very decent old Widow Woman, goes out to Scrub and wash, but sprain'd her wrist some Weeks ago, and has not been able to do much lately. She has a Nephew living with her, a young Man of 27 years of age a painter by trade, who has always helped to support her – but he met with a very serious accident (which the Visitor himself witnessed) at the time of the Visit of the Prince of Wales, He fell from the Scaffolding of the Orange Arch, on which he was at Work, and was so much injured, that his recovery for some time, was very doubtful, and he is still unfit for Work of any kind. 169. Ellen Connell, Duke Street, last door in the row of Brick Houses near the Engine House. This Woman has a Cripple Son a most wretched pitiable object, utterly incapable of helping or taking care of himself – being an idiot as well as a cripple. She herself is a worthless drunken creature, and were it not for her Son, The Visitor would not recommend her for any assistance. She is living with a man and his Wife of the name of Hornet, poor labouring people. Some charitable Ladies allow the Hornets a small Sum a Month for keeping Mrs. Connell and her Son, but they are pretty tired of their charge. Mrs. Connell might perhaps have a loaf of Bread per Week given to her for a few Weeks, and the Visitor told Hornet that if he chooses to go up to saw some Wood, he might be allowed a quarter Cord, as he gives the use of his Stove to Mrs. Connell.

170. Elizabeth Meehan, next to No. 444 King Street east. Methodist, husband deserted her, she does not know whether he is dead or alive, She has 4 Children at home girl 9, Boy 8, Boy 6 and girl 4. Visited the Institute for the purpose of enquiring whether a Young Girl from the age of 8 to 10 years could be had for a respectable Farmer in the Country and went through the entire establishment conducted by the Superintendent Mr. Duckett. I really felt highly pleased at the cleanliness and good order prevalent through the entire House which I think reflects great credit to the Committee and Superintendent and would greatly desire that more of our Citizens would call and see for themselves the great value of such a charitable Institution and how well it deserves their support and attention.
